REGULATORY INTELLIGENCE INTERN

About Ascent
Ascent Technologies, Inc. helps its customers follow laws and regulations with technology. We are a new type of company, a SaaS plus content and RegTech organization that combines our technology platform with informational intelligence to help people automate compliance with rules and regulations in an easier and less expensive way. We’re unique because we marry modern techniques like automated data ingestion, machine learning and predictive analytics with traditional notions of compliance to stay on the cutting edge of our industry.

As trailblazers in our space, we’re looking for people who are passionate about building new and innovative products, who aren’t afraid of challenging the status quo, and who have a thirst for knowledge, hard work, and creating amazing solutions to generations-old problems. We want to work with people who enjoy autonomy and who can help deliver products that change customers’ lives.

Duties & Responsibilities
- Create data/content that appears in the Ascent Customer Application
  - Review regulations and distill requirements and supporting information
  - Create/maintain issued Regulatory Documents
- Work with Manager to identify opportunities to improve Regulatory Content Process

Skills
