Handel Architects strives to be a leader in emerging design technologies.

COMPUTATIONAL DESIGN INTERNSHIP
A unique, cross-disciplinary opportunity for Computer Science students.

Description
Handel Architects is an industry-leading architecture firm of over 200 designers and dreamers across four offices. We pride ourselves on our excellence in design, focus on sustainability, and engaging company culture.

Come solve interesting problems, as part of a **PAID**, 12 week Summer Internship, starting in June.

The goal of this program is to perform Research and Development focused on building or improving in-house software tools, and exploring emerging technologies.

Topics include working with web-based API’s, digital modelling, parametric design, virtual/augmented reality, machine learning, 3D printing, and digital fabrication.

Eligibility
Internship is open to applicants currently enrolled in a graduate or undergraduate computer science program. A strong applicant must have the ability to code (preferably in C# and Python at a minimum), must be organized/capable of working in a self-directed manner, and above all else, must be interested in tackling challenging problems in the architecture, engineering, and construction domain.

Dates
March 20th, 2020 - Deadline for applications
March 25th-31st, 2020 - Video interviews
April 10th, 2020 - Announcement of award
