Company Description:
Pie for Providers is an open-source, non-profit project focused on supporting childcare providers and the families who rely on them. Our work was incubated at the University of Chicago Booth School of Business and has been nationally recognized by organizations like OpenIDEO and Promise Venture Studio.

Pie for Providers helps small child care providers and families claim the government funding for which they are already eligible. Today, 85% of eligible children do not claim this funding. This means families struggle to afford care and child care providers - small, women-owned businesses - do not get paid for their work. The current public health crisis threatens to wipe out 30%+ of child care businesses, making this project even more urgent. We’re building a Rails and React app to help child care providers claim and manage their government subsidy funding.

Position Description:
We are hiring software development and engineering interns to play a crucial role in building our core product. This is an opportunity to work on a product with high social impact at the intersection of civic technology, early care & education and economic development. You will have the opportunity to influence core product features and receive mentorship from our Lead Engineer.

Responsibilities include:
- Work with an agile team to develop, test, and maintain key features of the Pie for Providers’ Rails and React web app
- Analyze and resolve technical and application problems
- Package and support deployment of releases
- Participate in code review and QA
- Work closely with design team to implement designs
- Adhere to high-quality development principles while delivering in accordance with sprint milestones

Qualifications and Requirements:
- Experience with React and/or Rails (including school projects and internships)
- Highly self-directed and independently motivated

Working with Pie for Providers, you’ll get:
- Experience on the frontlines of a social venture making a positive impact
- Ownership of projects that will directly impact our company strategy
- The flexibility and independence of working on a fully remote/distributed team with part-time and full-time options
- Help identifying and applying for funding sources (unfortunately, there is no stipend available at this time).

Interested candidates should send a resume and brief statement of interest to chelsea@pieforproviders.com
