Internship: AI-Development Internship Opportunity

Location: Remote / Chicago, IL

The Role:
Brockhurst & Buchanan is seeking ambitious and technology-savvy students interested in breaking into private equity. Our firm is developing cutting-edge, AI-powered tools to accelerate our deal origination pipeline. You will build, test, and deploy a novel and proprietary software tool (more details available post-NDA). Interns will also be able to deploy the tool and monitor its performance in real-world environments.

About Us:
Brockhurst & Buchanan (B&B) is an emerging, family-owned investment firm primarily exploring investments in the senior care market. We founded the firm after personal experiences inspired our family to create a better world for our parents. We are building a unique, technology-powered workflow to find quality deals and build a best-in-class portfolio. Join us as we grow and expand!

Key Responsibilities:
- Collaborate with our tech team and investment committee to design and build AI-driven tools to enhance our deal origination processes.
- Test and refine software solutions using cutting-edge programming languages and frameworks.
- Deploy and track your tool's performance in live settings, contributing to real-world financial strategy.
- Assisting in the development and maintenance of a deal pipeline.
- Participating in investment strategy sessions and contributing to team discussions.

Qualifications:
- Extensive experience with computer science, data science, coding, and large language models (including, but not limited to ChatGPT, Gemini, etc.)
- Able to develop, deploy, and monitor custom software solutions.
- A strong interest in private equity and/or entrepreneurship through acquisition (ETA).
- Detail-oriented and able to manage a complex pipeline of deals and relationships.
- An advanced degree in computer science is preferred.
- Progress toward an MBA is a plus.

What We Offer:
- Real-world experience developing AI and machine learning applications in the private equity sector.
- Knowledge of the software development lifecycle and its applications to business strategy.
- Hands-on experience in a tech-enabled private equity investment firm.
- Exposure to real-world investment processes and decision-making.
- Mentorship from experienced professionals in the field.
- A collaborative and supportive team environment.
- Flexible hours and a Remote work setting to accommodate your academic schedule.

Application Process:
To apply, please submit your resume, a quick note outlining your experience with application development, and any other relevant details by 5/1/24. Applications should be sent via email to mark@brockhurstgroup.com.
